Aleksei Gaile

Software Engineer (Java)
Tallinn, Harjumaa, Estonia

Summary

Based in Tallinn, Estonia | Europe

I have over 5+ years of experience in developing and delivering scalable, secure, and reliable solutions for various industry domains using Java, Spring Boot, Microservices, and Agile methodologies.

Recently transferred the deployment of projects on GoCD to elastic agents using the following tools - Kubernetes, Kuberspray, Ansible, Terraform, and OpenStack. This improved the reliability of project deployments and accelerated project deployment times, as well as saved time on resolving GoCD issues.

I also rewrote the legacy project from the old stack to Spring Boot using Spring Boot, Java 17, and Maven, which reduced the technical debt in the team.

Domains Worked for:

- . Finance
- . Banking
- . Retail
- . iGaming

Tech stack:
