Aleksei Gaile

Software Engineer (Java)
Tallinn, Harjumaa, Estonia

Summary

Participated in several projects, and developed many technical solutions. Successful experience in launching new projects and delivering them to clients.

Recently transferred the deployment of projects on GoCD to elastic agents using the following tools - Kubernetes, Kuberspray, Ansible, Terraform, and OpenStack. This improved the reliability of project deployments and accelerated project deployment times, as well as saved time on resolving GoCD issues.

I also rewrote the legacy project from the old stack to Spring Boot using Spring Boot, Java 17, and Maven, which reduced the technical debt in the team.
